

IskUber

Use Case Specification

Submitted to:

Asst. Prof. Ma. Rowena C. Solamo
Faculty Member
Department of Computer Science
College of Engineering
University of the Philippines, Diliman

Submitted by:

Bilaw, Nicole
del Rosario, Luis Gabriel
Tamayo, Juan Gabriel

In partial fulfillment of academic requirements
for the course
CS 191 Software Engineering I
of the
1st Semester, AY 2017-2018

Unique Reference:

The documents are stored in the IskUber GitHub Repository Link.

<https://github.com/CrumbleThorn/IskUber>

Document Purpose:

This document serves as the official Use Case Specification document for IskUber. This document expounds on the internal details of the use case.

Target Audience:

This document is targeted towards software engineers who wish to learn about the specific flow of events for each use case of the system.

Revision Control*History Revision:*

Revision Date	Person Responsible	Version Number	Modification
10/08/17	Luis Gabriel Q. del Rosario	1.0	Initial Document.
10/11/17	Juan Gabriel C. Tamayo	1.1	Filled out empty fields and tables, and added the Activity Diagram; Version number should match the one found in the footer.

Use-Case Name: 6.2 Cancel Passenger Request

Description: The user may cancel their passenger request if they made an incorrect request, or if they have found a better option. This may be done as long as the driver has not accepted the request yet.

Preconditions: The user must have created an account (Use Case 4.1) and have sent at least one passenger request (Use Case 6.1).

Flow of Events:

Scenario Name	Description
Scenario 1 (Basic Flow) User wishes to cancel request, and confirms the cancellation.	1. The user cancels their request. 2. The server acknowledges the cancellation, and the change is reflected on the driver's request list.

Activity Diagram of the Flow of Events:

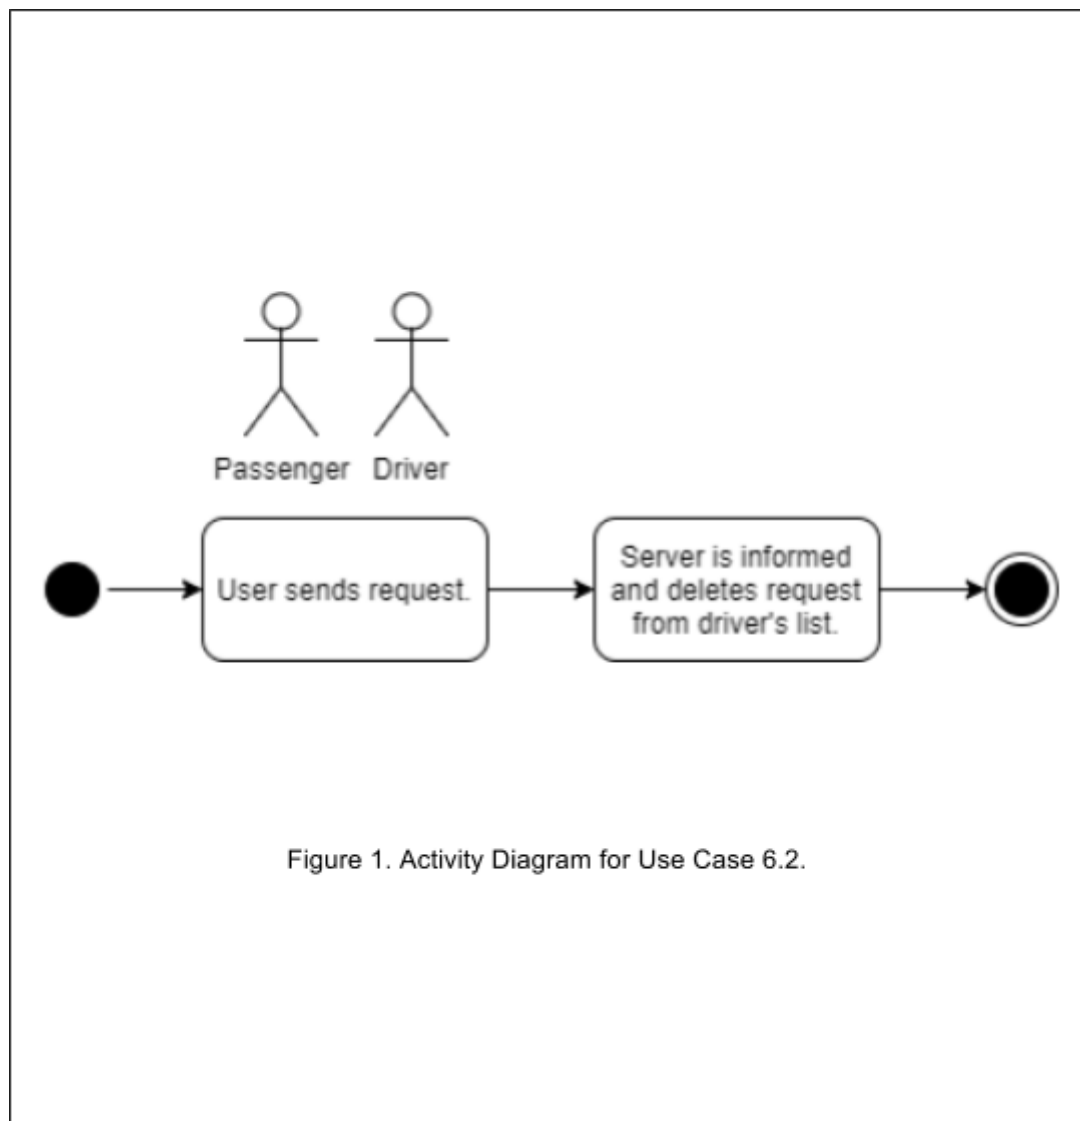

Figure 1. Activity Diagram for Use Case 6.2.

Postcondition: NONE

Relationships: This Use Case is related to Use Case 6.0.

Special Requirements:
NONE
