

IskUber

Use Case Specification

Submitted to:

Asst. Prof. Ma. Rowena C. Solamo
Faculty Member
Department of Computer Science
College of Engineering
University of the Philippines, Diliman

Submitted by:

Bilaw, Nicole
del Rosario, Luis Gabriel
Tamayo, Juan Gabriel

In partial fulfillment of academic requirements
for the course
CS 191 Software Engineering I
of the
1st Semester, AY 2017-2018

Unique Reference:

The documents are stored in the IskUber GitHub Repository Link.

<https://github.com/CrumbleThorn/IskUber>

Document Purpose:

This document serves as the official Use Case Specification document for IskUber. This document expounds on the internal details of the use case.

Target Audience:

This document is targeted towards software engineers who wish to learn about the specific flow of events for each use case of the system.

Revision Control*History Revision:*

Revision Date	Person Responsible	Version Number	Modification
10/08/17	Luis Gabriel Q. del Rosario	1.0	Initial Document.
10/11/17	(name)	1.1	Filled out empty fields and tables, and added the Activity Diagram; Version number should match the one found in the footer.

Use-Case Name: 7.1 Remove Trips

Description: Users may remove trips from their current list of trips. This will inform the driver of their cancellation, and will revoke their slot from the respective driver's vehicle.

Preconditions: The user must have registered for an account (Use Case 4.1), and have an existing trip (through Use Case 6.1).

Flow of Events:

Scenario Name	Description
Scenario 1 (Basic Flow) The user removes a trip from their list.	1. The user confirms the removal of the trip. 2. The server acknowledges the removal, and informs the driver associated with the trip.

Activity Diagram of the Flow of Events:

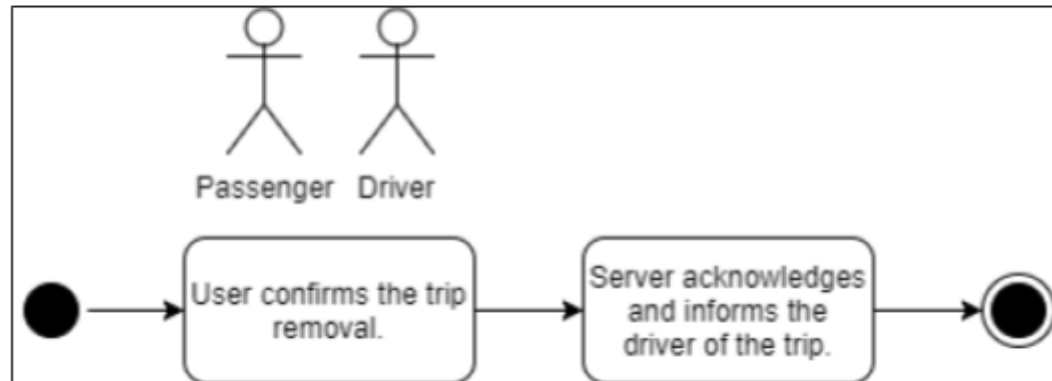

Figure 1. Activity Diagram for Use Case 7.1.

Postcondition: NONE

Relationships: This Use Case is related to Use Case 7.0.

Special Requirements:
NONE
