

TEAM PERFORMANCE ASSESSMENT

This Team Performance Assessment is designed to create an objective discussion about team performance during the course of doing the artifacts in CS 191 Software Engineering 1. It helps team members work out how well they are working at the moment and identify the areas they want to address to help them perform better in the implementation, test and release of the software (CS 192 Software Engineering 2).

This assessment has four areas of concentration in terms of team performance, namely,:

Purpose and Shared Direction. A team that has a shared understanding of what they are trying to achieve, why and what success looks like, produces best outcomes. They show the way and model right behaviors- both in terms of direction and how people behave and work together.

Result-oriented. A team pays attention to the things that matter and their proper direction. They make tough calls and consciously divide their time and stay focused on their joint goals.

Joint Accountability. A team's members take responsibility for their own part in delivering the team's goals and helping others to achieve them. Failing to deliver or letting others down is not OK.

Team relationships. Everyone treats each other with respect, is open on uncomfortable issues and takes time to understand others' needs. It's OK to admit mistakes and weaknesses.

INSTRUCTIONS:

- 1.) Use the descriptions below to score your personal assessment of the way that your team worked together. For each statement, give a rating from 0 to 4.
- 2.) Share your individual assessment with other team member to come up with an overall team assessment, calculating the average score for each category.
- 3.) The team should reflect on the results and develop an action plan to improve overall effectiveness in working together in the implementation and testing phase.

PART 2: GROUP REVIEW

From the 3 important statements of each individual assessment, discuss and agree with your teammates the three (3) most important statement to your team. Write them down.

1	We pay attention to what really matters most.
2	We understand individual roles and what is expected by each individual team.

3	We are clear about what individual strengths each member of the team brings.

From the 3 lowest scored statements of each individual assessment, discuss and agree with your teammates the three (3) lowest statement of your team. Write them down.

1	We make the tough calls about priorities.
2	We divide our time well to accomplish team goals.
3	We are clear about commitments and areas of accountability.

Decide as a team the level of strength the team has for each area of team effectiveness. Place a check mark at the appropriate level of strength.

Having reviewed your groups answers and data, reflect and write down the team's thoughts in response to the following questions:

What are the key strenghts of the team that you want to acknowledge and build upon?	Why is this important?
The team knows what matters the most and tries hard to prioritize the more important things.	The team will be able to maximize the use of time if the more valuable things are done first.

<p>What are the key areas does the team want to focus to enhance the performance of the team?</p> <p>We want to focus on a stricter rule for deadlines of tasks so that we won't have to cram so much at the end of the sprint.</p>	<p>Why is this important?</p> <p>Following the sprint timeline is important so that the project progresses at the right pace.</p>

Where will the team start?

Enhancing team performance can take time- often there's a mix of changing what you do and how you do it. Look at the key areas for your team. What concrete steps will help the team move forward to CS 192 Software Engineering?

<p>The team should not underestimate the tasks at hand. In this sprint we had a hard time integrating the frontend code to the backend code. That task was crucial for the this sprint.</p>

Previous Velocity: 55

Current Velocity: 13

What can the group say about the group's performance based on the team's velocity? Will you increase or decrease your velocity? Why?

The group did not do okay with the current velocity. I think this velocity should not remain throughout the next sprints. There's only one sprint left for the project and I think the gist of the task for the last sprint is improvement of the UI and fixing the integration to the database and fixing the structure of the database.
